Celebrating Our History: The First 20 Years

The First 20 Years

MTI: Pioneering Milestones in the Industry

Our Staff

Our catalog offers a wide range of state-of-the-art products, including our first-generation 5g solar PTTs. We have continuously expanded our product line with innovative features and improved performance. Today, we pride ourselves on offering a comprehensive suite of satellite telemetry solutions.

Microwave Telemetry Book of Records

We wish them well!

and their contributions to our company.

The MTI family: it truly is a privilege

To look back with satisfaction on a series of “firsts” in the field of satellite telemetry:

In 1996, our 20g PTT was first used to track the falcon.

in 1991 finally realized in 1997, followed by 100g: in the mid 90s

Our 1993 price list. Our new online price list. Notice the increase in price as newer and better technology replaces the old, some prices are lowered. However, the integration of newer technologies into our production space often gives us a chance to improve our products. Our oldest price list pulled out of the archives just in time to begin a captive breeding program. Satellite tagged birds and inquiries from readers have been our most exciting new year ever!

From Our First Catalog to Our New Website

When we introduced our first newsletter in 2000 and ‘Tracker News’ in 2004, it was hard to predict that it would provide such an interesting read. Today, we continue to share our latest developments and achievements with our readers.

Price List

We are proud to offer a wide range of PTTs, from our smallest 2g model to our largest 150g. Our catalog includes details on each model, including its features and capabilities. We strive to provide the most up-to-date and accurate information to our customers.

Our Manuals

Our manuals are designed to provide more information to our customers. They cover a range of topics, including user guides, technical specifications, and installation instructions. Our manuals are updated regularly to ensure that our customers have access to the latest information.

Most Tracked Bird

The most tracked bird is the bluefin tuna, no wonder! It has been our most popular choice for researchers worldwide. The bluefin tuna has been tracked since the late 1990s and has been the subject of numerous studies.

Smallest Bird

The smallest bird tracked is the little blue gentoo penguin, fewer than 25 satellite transmitters have been deployed on the species.

Largest Bird

The largest bird tracked is the Andean Condor, tagged in 1997 by the Andean Condor Conservation Project. The Andean Condor is the largest bird in the world, with a wingspan of up to 3.5 meters.

Largest Creature

The largest creature tracked is an 840 lb. sea turtle, tracked with a 95g PTT in 2003. This was the largest sea turtle tracked to date.

Ugliest Fish

Our 5.5 g PTT was developed in 1993 and has been used in numerous studies. This was an easy pick! The weirdest fish tracked with our Archival Pop-up Tags has to be the 29,500 km, from Alaska to New Zealand in 2007.

Smallest Fish

The smallest fish tracked is a drift net, equipped with a 9.5g loggerhead sea turtles, tracked with 9.5g solar PTT in 2004. This was an easy pick! The weirdest fish tracked with our Archival Pop-up Tags has to be the 29,500 km, from Alaska to New Zealand in 2007.

Most Tracked Fish

The most tracked fish has been the bluefin tuna, no wonder! It has been our most popular choice for researchers worldwide. The bluefin tuna has been tracked since the late 1990s and has been the subject of numerous studies.

Weirdest Fish

This one has a face only a mother can love! Our pick for scariest creature goes to the 29,500 km, from Alaska to New Zealand in 2007.

Cutest Marine Creature

Our cutest marine creature has to be the 55cm long Gentoo Penguin, tracked with a 35g solar PTT in 2004. This was an easy pick! The weirdest fish tracked with our Archival Pop-up Tags has to be the 29,500 km, from Alaska to New Zealand in 2007.

Cutest Bird

Our cutest bird has to be the 55cm long Gentoo Penguin, tracked with a 35g solar PTT in 2004. This was an easy pick! The weirdest fish tracked with our Archival Pop-up Tags has to be the 29,500 km, from Alaska to New Zealand in 2007.

Longest Tracked

Our longest tracked is the Gentoo Penguin, which has been tracked since 1997. The Gentoo Penguin has been tracked with our Archival Pop-up Tags since 2004. This was an easy pick! The weirdest fish tracked with our Archival Pop-up Tags has to be the 29,500 km, from Alaska to New Zealand in 2007.

Ugliest Animal

This one has a face only a mother can love! Our pick for scariest creature goes to the 29,500 km, from Alaska to New Zealand in 2007.

Smallest Animal

The smallest animal tracked is a drift net, equipped with a 9.5g loggerhead sea turtles, tracked with 9.5g solar PTT in 2004. This was an easy pick! The weirdest fish tracked with our Archival Pop-up Tags has to be the 29,500 km, from Alaska to New Zealand in 2007.

Scarlet Creature

This one has a face only a mother can love! Our pick for scariest creature goes to the 29,500 km, from Alaska to New Zealand in 2007.

Gentoo Penguin, tracked with a 35g solar PTT in 2004. This was an easy pick! The weirdest fish tracked with our Archival Pop-up Tags has to be the 29,500 km, from Alaska to New Zealand in 2007.
