Lifetimes in Technology -**Generations** Converge

Looking back, we can't help but think that we have achieved many of the combany's goals set forth at the beginning of the year. Our conference in Looking back, we can't help but think that we have achieved many of the one in March company's goals set forth at the beginning of the year. Our conference in March was a grand success. The information disseminated from the cutting-edge was a grand success. company's goals set forth at the beginning of the year. Our conference in N was a grand success. The information disseminated from the cutting-edge research being performed around the world, all in an effort to conserve Dear Customers and Friends, was a grana success. The information asseminated from the cutting-edg research being performed around the world, all in an effort to conserve what remains was truly humbling to us. It became clear to me that research being performed around the world, all in an effort to conser what remains, was truly humbling to us. It became clear to me that we scientists have always been walking this bath together. some long what remains, was truly numbing to us. It became clear to the that we scientists have always been walking this path together, some longer than others. In this issue of our neusletter Thomas Alerstam. Tim we scientisis nave atways been waiking this path together, some lon than others. In this issue of our newsletter Thomas Alerstam, Jim Watson, and Hirovashi Higuchi attast to this as thay describe thai Watson, and Hirovashi Higuchi attast to this as they describe than others. In this issue of our newsletter Thomas Alerstam, Jim Watson, and Hiroyoshi Higuchi attest to this as they describe their nearly lifelong involvements in tracking hirds while newcomers fro Watson, and Europosni Engliciti attest to unis as they describe them nearly lifelong involvements in tracking birds, while newcomets from the Cape Flouthera Institute and Rillie Roberts and Kelly Roche. nearly uperong involvements in tracking otras, while newcomers from the Cape Eleuthera Institute, and Billie Roberts and Kelly Roche, (recipients of our educational award) update us on their students the Cape Elementa Institute, and Builde Roberts and Keny Roche, (recipients of our educational award) update us on their students projects. The next generation of hudding scientists is showing of recipients of our educational awara) update us on their students of our educational awara) update us on their students so projects. The next generation of budding scientists is showing so much promise. To see our some and deputiters (literally) is initially is initially initi projects. The next generation of buading scientists is snowing so in much promise. To see our sons and daughters (literally) joining us in our disciplines truby is a testament to the importance of the research

much promise. To see our sons and daugneers (Interday) Joining us in our disciplines truly is a testament to the importance of the research being conducted The future is bright. Since the company's inception, our customers have instituted us to invent and provide technology to enable animal have instituted us to invent and provide technology to enable animal have instituted us to invent and provide technology to enable animal have instituted us to invent and provide technology to enable animal have instituted us to invent and provide technology to enable animal have instituted us to invent and provide technology to enable animal have instituted us to invent and provide technology to enable animal have instituted us to invent and provide technology to enable animal have been as a set of the enable animal have been as a set of the enable animal have been as a set of the enable animal have been as a set of the enable and the enable animal have been as a set of the enable animal have been as a set of the enable animal have been as a set of the enable animal have been as a set of the enable animal have been as a set of the enable and the enable animal have been as a set of the enable animal have been as a set of the enable animal have been as a set of the enable and the enable as a set of the enable animal have been as a set of the enable as a set of the en ine juture is oright. Since the company's inception, our customers have inspired us to invent and provide technology to enable animal conservation. Per your request, we have unveiled our new line of tel nave inspired us to invent and provide technology to enable animal conservation. Per your request, we have unveiled our new line of telemetry products, which uses the CSM network to transmit data. For years we have conservation. Per your request, we have unveiled our new line of telemetry products, which uses the GSM network to transmit data. For years, we have products, which uses the Collect more CDS fires. Now we foar that we will been asked to find ways to collect more CDS fires. Now we foar that we products, which uses the GSM network to transmit data. For years, we have been asked to find ways to collect more GPS fixes. Now, we fear that we will receive complaints because there is too much data! being conducted. veen usken to juin ways to conect more Gro jukes. I receive complaints because there is too much data!

We know how difficult your work is – we are grateful for all your efforts (especially those who contributed to this newsletter and our 2013 calend We know now alflicult your work is – we are grateful for all your efforts (especially those who contributed to this newsletter and our 2013 calendar). The significance of the studies being performed is truly greater than anyone (especially those who contributed to this newsletter and our 2013 calendar). The significance of the studies being performed is truly greater than anyone can fathom. In many instances, it now seems possible to see increased abundance of I ne significance of the studies being performed is truly greater than anyone can fathom. In many instances, it now seems possible to see increased abundance of fathom. In species such as hald eagles and opprevent really is possible to adapt our Jatnom. In many instances, it now seems possible to see increased abundance of certain species, such as bald eagles and ospreys. It really is possible to adapt our units of that we humans can coexist with other animals. Hopefully, the next ways, so that we humans can coexist with other animals. certain species, such as bala eagles and ospreys. It really is possible to adapt ou ways, so that we humans can coexist with other animals. Hopefully, the next cohort of scientists will help us make even greater headway. As we start anot ways, so that we humans can coexist with other animals. Hopefully, the next cohort of scientists will help us make even greater headway. As we start another vear of hard work. let's keep the forward momentum going – it will be worth it. conort of scientists will netp us make even greater neadway. As we start another year of hard work, let's keep the forward momentum going – it will be worth it. From our family to yours, we wish you a relaxing and joyous holiday season and hest wishes in the New Year

best wishes in the New Year.

Paul and the Team at MTI Sincerely,
