Downsizing in a Super-Sized World

Though not yet halfway over, 2017 has already included a lot, Dear Customers and Friends, mough not yet nanway over, 201/ nas ancauy menucu a not of progressive changes here at MTI. Progress, however, doesn't of progressive changes here at manual accommon progressive changes here at MTI. or progressive changes here at 19111. Progress, nowever, doesn't always indicate expansion or growth, a sentiment particularly aways murcare expansion of growth, a semimon particular relevant as we introduced our (and the industry's) smallest solar Argos-linked PTT ever. Now, many 2g PTTs have Solai rigos-inikcu r 1 1 evel. Inow, many 28 r 1 15 nave been deployed on birds that all weigh less than 100 grams (roughly the weight of our original PTT-100). As with any

new product, its introduction has required adjustments and absolute focus from our entire team. Though our years of experience per person at 1911. Each person plays a vital why we do not role in MTI's and your projects' successes. We are often asked why we do not role in MTI's and your projects' successes. The angular role in a course portions of the manufacturing process. team consists of only 25 people, we average almost 9 years of experience per person at MTI. Each person plays a vital years of experience per person at will are often colored with the in MTI's and your projects, encourage will are often colored with the person of t role in M11s and your projects successes. We are onen asked why we do not outsource portions of the manufacturing process. The answer is simple. MTI outsource portions of the manufacturing principle, which we apply to our business founded under a "quality-first" principle. oursource portions of the manufacturing process. The answer is simple, will a some manufacturing process. The answer is simple, will as our production output. As environmental movements was founded under a "quality-first" principle, which we apply to our business was founded under a "quality-first" principle, which we apply to our business was founded under a "quality-first" principle, which we apply to our business was founded under a "quality-first" principle, which we apply to our business was founded under a "quality-first" principle, which we apply to our business was founded under a "quality-first" principle, which we apply to our business was founded under a "quality-first" principle, which we apply to our business was founded under a "quality-first" principle, which we apply to our business was founded under a "quality-first" principle, which we apply to our business was founded under a "quality-first" principle, which we apply to our business was founded under a "quality-first" principle, which we apply to our business was founded under a "quality-first" principle, which we apply to our business was founded under a "quality-first" principle, which we apply to our business was founded under a "quality-first" principle, which we apply to our business was founded under a "quality-first" principle, which we apply the principle was founded under a "quality-first" principle wa was rounced under a quarry-mst principle, which we apply to our bushing structure as well as our production output. As environmental movements encourage a societal shift towards consuming special shift towards consuming sp Suuciuic as well as our production output. As environmental movements "local," we can proudly say encourage a societal shift towards consuming "Virtually every sten of we have consistently done so for the last 26 years. we have consistently done so for the last 26 years. Virtually every step of the manufacturing process from populating circuit heards to troubleshooting discourses. we have consistently done so for the part and the part are produced by manufacturing process, from populating circuit boards to troubleshooting data, and manufacturing process, from populating circuit boards to troubleshooting data, and manufacturing process, from populating circuit boards to troubleshooting data, and manufacturing process, from populating circuit boards to troubleshooting data, and manufacturing process, from populating circuit boards to troubleshooting data, and manufacturing process, from populating circuit boards to troubleshooting data, and manufacturing process, from populating circuit boards to troubleshooting data, and manufacturing process, from populating circuit boards to troubleshooting data, and manufacturing process, from populating circuit boards to troubleshooting data, and manufacturing process, from populating circuit boards to troubleshooting data, and manufacturing process, from populating circuit boards to troubleshooting data, and manufacturing process, from populating circuit boards to troubleshooting data, and manufacturing process, from populating circuit boards to the process data and the process data an manufacturing process, from populating circuit boards to troubleshooting data, is completed within our facility. And many of the parts we use are produced by follow Maryland businesses. So as we work to continually downsize our facility. is completed within our faculty. And many of the parts we use are produced by fellow Maryland businesses. So as we work to continually downsize our footprint fellow Maryland businesses.
